

## Use case

Consolidation

Datasheet

## There's a problem with cyber security

Budgets are being cut. IT teams are short staffed. The introduction of remote working has ushered in a talent war, making it hard to retain staff. All the while, the increased demand for security has raised prices. Senior management want to bolster their security but struggle to allocate the resources and that's because there's a problem with cyber security.

Typical cyber security tools each only provide a single focus, just one piece of the puzzle. So IT teams are forced to manually piece together an expensive "patchwork of programs" with limited communication facilities. You end up jumping between a dozen tools just for simple day-to-day tasks. And organisations can't always afford the expensive license fees for every user, leaving gaps in their security and causing them to fail audits. As organisations grow, the problems only get worse.

And so many organisations are looking to consolidate their tech stack.

“

*"We could reduce our security system needs by 60% with Rebasoft"*

*CISO, Retail*

## These are the problems we hear:

- **Paying for expensive software** for a complex "patchwork of programs"
- **Jumping between programs** just to do one job
- **Gaps in your security** due to lack of licences
- **So many programs that you don't know what you have** so you end up paying for all of them

## Rebasoft can help you consolidate your security

Rebasoft provides the functionalities of multiple cyber security programs. Like asset management, secure configuration and vulnerability management. So with Rebasoft, you can cover the same ground with less complexity and lower cost.

### What are the benefits?

- **Save time** everything is integrated into the asset discovery system, so you don't need to jump between separate programs anymore
- **Save money** from unnecessary solutions
- **Reduce complexity**
- **Simple**—there's no need to install any other hardware or software
- **Take the weight off your staff**—consolidated security solutions require less staff to manage them
- **Threat detection**—it's much easier to identify and respond to threats from one program
- **Efficiency**—consolidation allows automation and streamlining of manual tasks

### How we provide value

Rebasoft discovers, assesses and tracks security compliance all from one platform.

- **A single deployment** collecting and consolidating information means you do not need humans to manually collate and report on data
- **Integration into asset management** means you do not need to spend hours tracking down systems that need security remediation
- **Lightweight**—collecting information effectively and automatically reduces the load on managed IT systems
- **Fewer systems and automation** helps reduce complexity and workload on busy IT teams
- **Automation** helps eliminate manual tasks and reduces human error

## Try it now

There's nothing like seeing it in action. After all, you wouldn't buy a car without test driving it.

## About us

We at Rebasoft are committed to delivering a robust cyber security solution that addresses genuine business needs. We are not interested in a "silver bullet" approach. We believe that multiple functionalities from one platform and real-time data are essential for keeping up with today's cyber threat landscape. We believe this approach is the future of cyber security and we aim to be the pioneers. We are proudly a UK based company. Visit us at [www.rebasoft.net](http://www.rebasoft.net)
